

If the robot car V4.0/Tumbller carV1.1 does not work after you upload the main program, please change the Arduino AVR Boards version to 1.8.3. You can refer to the below steps to operate.

1 Please select board and click board manager.

2 If the Arduino AVR Boards version is 1.8.4 or above, please select 1.8.3 and install it.

3 Restart Arduino IDE and upload the main program to the car.
